J Series Ratio:Feeder® Injection Systems  
*Building the Best Injectors for Over 50 Years*

The J Series injector is the most reliable, accurate and flexible injection system on the market. Systems can be configured to handle almost any application. Multiple chemicals can be injected at different rates and rates can be adjusted without recalibration. Common applications include fertigation, pH adjustment, sanitation, and injecting wetting agents, soaps and many other chemicals. The J Series injector is also the only system on the market which utilizes a blend tank to ensure that solutions are uniform and evenly distributed.

# J Series Ratio:Feeder® Injection Systems

## Features

- Control EC and pH and inject sanitizers all with one system
- Easy installation and operation
- Extremely accurate injection saves money on chemicals
- Legendary dependability saves time on maintenance
- Accuracy does not degrade over time
- Positive displacement and volume proportioning
- Adjustable feed rate without recalibration
- Low pressure loss
- Expandable and flexible

## Specifications

- Operating pressure: 30psi to 125psi
- Accommodates flow rates from 1/4 to 10,000 GPM
- Water temp: 33° to 140° F
- Power required: 12VDC or 120VAC
- No filter required
- 15 month warranty

## Standard Fertigation System Kits

Model	Flow Range	Max Feed Rate
JP51-2	3/4 to 50 GPM	1:100
JP52-1	3/4 to 50 GPM	1:200
JP101-3	1.9 to 100 GPM	1:100
JP102-2	1.9 to 100 GPM	1:200
JP161-4	1.9 to 160 GPM	1:100
JP162-2	1.9 to 160 GPM	1:200

- Systems can be customized to fit exact applications
- Components can be purchased individually
- Complete assembled systems available

### Popular Accessories:

A3-VCP - pH Adjustment Pumper  
 P1-HCP - Sanitizer Injection Pumper  
 02584 - J Compressed Air Kit  
 08649 - Calibration Standpipe
